Novelty: A layer (5) with latent image pattern including areas having different phase difference, is laminated on an optical diffraction structure (4). The latent image pattern is viewed through a polarizing plate.

Detailed Description: INDEPENDENT CLAIMS are also included for the following:

- (a) Recorded medium storing identification program;
- (b) Goods

Use: For affixing on various cards such as ID card, debit card, credit card, bank note, security certificate, etc.

Advantage: Forgery is prevented effectively.

Description of Drawing(s): The figure shows a sectional view of latent image pattern and optical diffraction structure.

Optical diffraction structure 4

Layer 5
